Tension Adjustable Back Straps

Mounting Clamps

Trunk Side Supports

Back Contouring

Removable Covers

gibbyBack

The GibbyBack is a unique back system, combining tension adjustable back support with height-adjustable trunk side supports. These features make it possible to contour the back to accommodate intermediate to complex asymmetrical spinal deviations and intermediate to complex kyphotic deviations while providing firm adjustable lateral support, allowing the user to sit balanced and upright, facilitating optimal use of their arms and hands. The back system should always be used in conjunction with a good positioning cushion to provide optimal postural support.*

GibbyBack Seating System Options

The GibbyBack fits on either our SullyActive or SamActive seating systems, as well as a wide range of other wheelchairs, both manual and motorised.

Please contact us to find out more.
