iziPositioner

The IziPositioner is an in-vehicle posture support seat. It provides stable and comfortable postural support for wheelchair and buggy users who struggle to sit upright independently while being transported in a vehicle. It can be fitted into a range of different vehicles using an adjustable rear strap system. It is a useful addition to a 24-hour positioning routine for the user.

NOTE: This vehicle positioner is not a safety seat, it only provides postural support. It must be used in conjunction with a vehicle's safety belt system.
