LATS

**Award
Winning**

The award-winning LATS are a first of their kind low cost, independently attachable and adjustable rigid trunk side supports. These lightweight supports can be fitted to a wide range of wheelchair types, both manual and motorised, to provide additional trunk support for intermediate level users. Each side support can be adjusted narrower by 25mm to ensure proper fit for multiple users. They are available in a variety of sizes to meet the needs of children and young adults.

We recommend using the LATS in conjunction with an appropriate tension adjustable back (TAB) and an appropriate cushion to promote healthy development of the pelvis and spine in children and to help prevent and delay pelvis and spinal deviations in adults.

CE certified and tested in accordance with ISO 16840-3.

Adjustable Back Straps

Back Contouring

Optional Extra Trunk Side Supports

Removable Cover

TAB - Tension Adjustable Back

The TAB is a basic tension adjustable back support made up of individually adjustable webbing straps. These can be used to contour the back rest to support users with mild asymmetrical spinal deviations and functions effectively when paired with a set of LATS trunk side supports. The back system should always be used in conjunction with a good positioning cushion to provide optimal postural support.

		BACK & CHAIR SIZE	MID-THORACIC	UPPER THORACIC	SHOULDER HEIGHT
