samActive seat

The SamActive is a flexible posture support seating system, which can be configured and adjusted for adult users with intermediate to complex postural needs. The open design means it can be fitted with a variety of seat cushions and back systems to ensure an optimal fit for each individual user, providing comfort and the best alignment of the body.

It can be mounted on one of three of our mobility base frame options for users with varying levels of mobility skills. These include the Rigid 24 Active Base, Rigid 10 Manual Base and our motorised Powerbase option.
