snoekieActive

Our SnoekieActive is an upright wheeler designed to provide children with all the benefits of supported standing in a device that they can also independently self-propel with. Supported standing assists with controlling severe muscle stiffness, spasms and uncontrolled movements and is a great way for children to interact with their peers.

A SnoekieActive forms an important part of a 24-hour therapeutic posture management programme. The supported prone position is perfect for propelling and engaging in interactive play.

More about the snoekieActive

BENEFITS OF USING A SNOEKIEACTIVE

- Promotes the healthy growth and development of legs and spine.
- Strengthens the hip joints and reduces the risk of hip dislocation.
