Clamps**

Seat System Options**

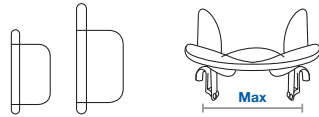

**Works with the
SullyActive &
SamActive Seats**

tessBack

The TessBack support is the ideal rigid back system to accommodate users with basic to intermediate postural support needs. With over 30 different back and side support combinations, this rigid back system can be used to seat a wide variety of wheelchair users who require firm pelvis and trunk side support. It maintains firm spinal alignment and promotes even weight bearing in sitting, which assists in preventing pressure sores and spinal deviations. By providing optimal support to the pelvis, trunk and back, the TessBack facilitates optimal arm and hand function.

Used in conjunction with a good positioning cushion, it promotes healthy development of the spine in children and helps prevent and delay spinal deviations in adults.*

CE certified and tested in accordance with ISO 16840-3.
